I'm just writing to express my deep concern and upset about the planned Sizewell C development. The more I have learned about it in the last 6 months the more worried about it I have become.

We are undergoing a climate crisis and your plans are a retrograde step in solving it. You will be building, polluting and consuming whilst ruining local environments ecosystems and the peace of a once rural area. If you must invest please find a greener alternative; wind power would be far better.

This is not a decision to 'help' our area or our population; but one driven by profit and greed. Those of you that have children must see that you will be responsible in part for a massive negative effect on their future environment and health.

I've no doubt my word means little and that you have a diplomatic trite argument in defence of this development; but please don't insult me. Your development is morally wrong.

Yours Sincerely

Ben Wardle
