Dear Sir/Madam

I write to express my opposition to the proposed construction of a third nuclear reactor at Sizewell. The reasons for not going ahead are too numerous to list here but chief among them are the following:

- 1 By the time the project is complete, developments in other, cleaner, renewable forms of energy will have advanced so far that the technology will be outdated
- 2 The cost is excessive.
- 3 The track record of the company involved is poor.
- 4 The rich natural habitat in a beautiful part of the world will suffer enormously.
- 5 Disruption in the local area during construction (eg from traffic) will be severe.
- 6 Any short-term gains in jobs for the local population will be offset by the long-term damage to the tourism on which it depends.

I sincerely hope you'll have the good sense not to proceed.

Yours sincerely Blake Morrison
