Dear Sirs

It is very important that Sizewell C does not go ahead. It will be much too expensive and will not be ready for many years. It's too late. I am also appalled at it being referred to as "green". It is not green as there's no long term remedy for its waste and the building of the reactor is certainly not green. This is a beautiful area full of rare habitats and wildlife. If local jobs are needed it would be much better to encourage tourism.

Yours faithfully

Deborah Sheppard
