Dear Sir/Madam

As a resident of Thorpeness. I am writing to express my opposition to the building of in effect two nuclear reactors on this beautiful but fragile coast. We are having at Thorpeness egress to contend with coastal erosion with rapidly receding cliffs. It's unthinkable having even more long term nuclear waste accumulating on this site and to be adjoining Minsmere is so inappropriate

I'm convinced by the arguments there are better alternatives including renewable energy & that to have a French company Chinese financed is offering overpriced out of date technology

I just do not want this in my back yard!!! Please turn this project down

F V H Weston
