Dear Sir/Madam

I am writing to formally record my opposition to the building of another enormous nuclear power station on one of the most naturally important habitats in our country. With gaping holes in the plans such as a lack of fresh water supply (pipe it in from where?) and the plan for enormous wall to halt the erosion of the coast - solutions which smack of being brainstormed by primary children.

To approve this build in an area so dependent on tourism would be detrimental to the local economy for decades and decades. The cost to wildlife in the marshes, coastline and sea would irreparable. The solution to our energy crisis does not lay in the destruction of our environment.

Thank you for your time

Regards

Gill Parnaby
