Dear Sir/Madam,

I live in Eastbridge and oppose the massive Sizewell C and D project. Among my many concerns are the following:

1. The impact on a AONB, the loss of habitats and the damage to the Minsmere Bird Reserve and to the much loved walks through the area concerned.
2. Damage to the tranquility of a much loved place. Loss of safe bicycle access to the country lanes inland. Eastbridge will feel very cut off by the traffic.
3. Air, light and noise pollution. At present the area is very peaceful and has dark skies at night.
4. Massive impact of traffic and disruption to a peaceful area.
5. New concerns about the impact of a proposed water desalinating plant and lack of secured long term water supply.
6. The influx of workers
7. Concern about sea level rise and coastal defences. Loss of rare shingle vegetation. Loss of access to a large section of beach.
8. It takes too long to build, is outdated technology, too large scale and is not 'green'.

Yours sincerely,

Helena Simon
