Sizewell C is the wrong project in the wrong place and will not help the UK achieve it's objectives. It will take 10-12 years to build during which time local people will have their lives turned upside down. There will be greatly increased traffic. It is right next door to Minsmere and will have a catastrophic effect on the wildlife. This is a quiet peaceful area and after the destruction of Sizewell A and B nature has managed to fight back. I am 67 and will probably not live to see our environment recover. It is outrageous that you are now proposing us taxpayers pay for it.

Surely it would be better for levelling up if it was sited in the north of the country if we need it at all. Surely renewables are the way forward.

You take us for granted in Suffolk because there are lots of people who traditionally vote Conservative. Remember Amersham and Chesham? I believe that result was down to the government riding roughshod over local people's views on planning!

Please don't go ahead with this.
