Good day

Please please please do not allow this awful monstrose plan to proceed. It will destroy a beautiful part of the country. Impact hugely on wildlife.

Have you visited the area? Seen wonderful Minsmere & the neighbouring Sizewell Belts nature reserves for its enriched variety of birds & wildlife. Of international importance. Sizewell beach for its peace & quiet. The blots on the landscape are the previous power plants that sit there. Ask edf why none of this can be recycled/reused? A landscape contaminated by previous attempts at nucleur power.

Please come visit & see what it is they wish to destroy. Please do not rob future generations of this.

Years of traffic disruption. Its will have a hugh impact on local tourism. This is just not the place the build it.

Mass influx of workers & no water supply for them. Additional land to be swallowed up to build housing for them. How can this make sense? There is not the local infrastructure to support this.

Nucleur Power is not green.
Edf does not care about our countryside.
There is no going back from Nucleur.

Regards
Jacqui Taylor
