Subject: I oppose Sizewell C!
Date: 11 October 2021 10:21:43

Dear sir,

As your consultations come to a close, I want to express my strong opposition to the development of Sizewell C as a long time resident of the local area.

My opposition stems from the following:

Economics of nuclear power

The cost of nuclear energy per megawatt hour is ridiculously high, almost double, compared to renewable alternatives eg wind. Investment in new nuclear power stations diverts investment from long term, fully green, sustainable solutions.

Sustainability

Nuclear is not green! We have no solution to nuclear waste, a problem for centuries to come.

Uranium is mined, it is not renewable!

Impact on local environment

Sizewell C is a massive project that will devastate the beautiful surroundings and cannot fail to have a massive impact on nature given its location next to Minsmere, Dunwich Heath and in the heart of such an environmentally sensitive area.

The beach works will change forever the nature of Sizewell beach and highlight the questionability of building infrastructure on an eroding coast

Impact on local businesses

This area relies on tourism, people attracted by the unspoilt beauty of the Suffolk coast. This proposed massive building project will devastate the tourist economy, affecting pubs, hotels, rental properties, caravan sites and all associated services. It will forever change the character of this beautiful area.

Unsolved issues

Recently we have discovered that there is no sensible plan for water supply to the proposed building works. What else has not been thought through or brushed under the carpet in the greedy haste to move this flawed project forward.

Please do not approve this project.

Yours,

Jim Ashton
