---

Dear planning inspectorate sizewellC, I am writing to object in the strongest possible terms to SizewellC proposed construction. The location on the fragile coastline of Sizewell is on these grounds alone an appalling idea. A coastline subject to erosion amid the rising, and increasingly present dangers of climate change. It is environmental (in its widest sense) vandalism. It is economic lunacy and is a technological dinosaur. You must refuse this planning proposal by EDF. Rolls-Royce have far superior technology to build mini-nuclear power stations. EDF's own model at Flamanville is riddled with hideous problems. This is the model they are proposing for SizewellC. Yours sincerely Julia Gurney-Hoare.
