I am concerned about the:-

Lack of a secured long term water supply

- * concern about the impacts of a water desalination plant during construction
- * uncertainty about coastal defences amid new reports warning of sea level rise

[REDACTED]

et Gain.

As well as:-

- * Traffic and disruption
- * Impact on local business
- * Influx of workers
- * Loss of rare habitat etc

And why are we not investing in Wind power, which has now been proven to be the most cost-efficient source of energy?
