---

Dear Sir / Madam

We would like to strongly object to Sizewell C going ahead. There has been nothing said by the government, EDF or any other interested parties, that could possibly convince us, and many more residents living nearby that will be affected, that this is anything other than disastrous for the future of this beautiful area.

We all sit in judgement of what is happening in Brazil and its rainforests, but we are doing the same thing here.

. Beautiful countryside covered in concrete and areas of outstanding natural beauty ruined and animal habitat.

Why, why, why, was this beautiful area chosen over brownfield or an industrialised site?

. our already fragile coastline being destroyed.

. Traffic. Lordy! Where do we even start with this one?!

. Years and years of disruption, dirt and noise for local people

. Loss of tourist trade which many livelihoods depend

. After initial job creation, the then hundreds if not thousands of redundancies after completion; Look what happened after sizewell B!

. What happens after years of disruption? Does East Anglia just become a another concrete jungle while other similar ventures move in on us?

We won't meet the zero carbon emissions. This project is a waste of tax payers money. Billions wasted!

Unproven technology on the wrong site. No! No! No!

Yours faithfully

Karen and Toby Crisp
