Subject: Traffic management proposals for Wickham Market.
Date: 11 October 2021 17:20:17

I attended the village hall this weekend to view the plans.

I am totally against the entire project but feel that is now beyond any hope of halting. Given that Sizewell C goes ahead I would urge planners to look at further slowing traffic in the High Street. I noted the plans for "white gate" areas at the top and bottom of the High Street but I fear that, as happens at the moment, most slow at these areas, and will be forced to do so, but then literally put their foot down once through and speed away, especially down the hill. Speeding past our house, [REDACTED] is a regular occurrence through out the day. Many totally ignore the speed limits.

Please think of other traffic slowing measures between those I have mentioned.

This is our village and remains our village whoever needs to pass through it.
