

Dear Sir/Madam

I don't think a nuclear power station should be built here in Suffolk.

I'm really upset about you building a power station at Sizewell and causing damage to wild life and plants. The new buildings will take up lots of countryside. I love to fly my kite on Sizewell beach and take my puppy for walks, it will never be the same again if these huge buildings are built .

My grandma has solar panels on her roof, I think all buildings should have solar panels fitted. The money spent on SZC could be used to do this.

If Sizewell C is built all your trucks, lorries and buses will cause more pollution and make the planet even hotter.

I am very unhappy about the plans to build this power station and the new roads that will go across the beautiful countryside. I am worried about the effect the new power station will have on Minsmere and all the birds that come there.

I want this part of Suffolk and the coast to be protected not destroyed for ever.

Yours faithfully
