Dear Sir or Madam,

I am writing to express my concern about the planned development and building of Sizewell C.

I feel that not only will the development have a lasting detrimental effect on our beautiful heritage coast but that it will permanently damage the natural habitat for wildlife in this area of SSI.

The planned access road with a culvert as opposed to a bridge will have a serious impact on wildlife, essentially cutting off access so that wildlife will be trapped on one side or the other.

The desalination plant, a recent addition to the plans, will also cause damage to sea life and by running on diesel for the first years is hardly a green solution.

I have grave concerns that if this scheme goes ahead, it will be out of date and not fit for purpose by the time it is finished.

Finally, I worry that we are in danger of destroying what is an exceptionally beautiful landscape and a scientifically significant habitat for wildlife that future generations will never enjoy and benefit from if we do not do our utmost to protect it now.

Yours faithfully,

Nicola Guereca
