To whom it may concern,

I strongly disagree to the proposed Sizewell C nuclear power station for the following reasons:

1. It will cost 20 billion pounds Plus to build, this money could be invested in renewable energy.
2. The reactor that they intend to use has a terrible track record. Degraded fuel rod sealings on a nuclear power plant in China forced the plant to close. Is this what we want to happen in the UK?
3. Nuclear energy is not green and will never be.
4. The area in which you are planning to build it, is an AONB and will cause considerable loss of wildlife habitat.
5. An extra 12,000 vehicles will be traveling on the A12 every day if Sizewell C goes ahead, this will have a negative impact on the local community.
6. The nuclear waste created by Sizewell C will remain on site for 100 years and will remain radioactive for another 100,000 years.

This will be an unfair legacy to leave for future generations.

Please block this planning application.

Yours faithfully,
Rufus McMorran
