I would like to register my objection to the building of another nuclear power station -
This is not green energy - will highly radioactive waste needing storage forever more
The coastline is already compromised by global warming leaving the area prone to flooding in the future
(thinking of Japan)
The coastline is designated as an area of outstanding beauty, and is rich in wildlife and flora
As a country we should be leading the way in green, sustainable energy production
The finance arrangements involve investment from countries we would not choose to ally ourselves with in
terms of democracy and human rights.
Please note this as my formal objection to this project.
Best wishes,
Sue King
