Dear Sir/Madam,

I am writing to object, in the strongest possible way, about the absurd and ludicrous plan that is Sizewell C.

As a concerned local citizen, the whole proposed idea is intolerable. Take Hinckley Point for example- way over budget, late in construction and, like Sizewell C will be, obsolete on completion.

Then we have the damage to the beautiful coastline, an AONB, which will be gone forever, the suffering to wildlife at RSPB Minsmere is unthinkable, there are NO jobs for local people being created, all the work will go to already established personnel, and THEN we finally get to the construction. Lorries are not welcome on our narrow roads and through our towns, the influx of workers are not welcome here either, but the major concern is the coastal erosion that is extremely likely where the proposed site is going to be. It's simply not suitable for this plan....what about our future generations? No-one wants to leave them a nuclear time bomb for heavens sake!

Please, heed our heartfelt words, think of your conscious and those of the future.

Please stop this monstrosity from happening.

Many Thanks for Listening

Mr A.M Johnson

Please, don't allow this to go ahead, the coastline can't support this for starters, plus the alternative solutions are greener, safer, cheaper and will not damage the planet in the future. Wind power must be the alternative to this outdated, monstrous proposal.
Thank you for listening,
Mother Nature.
