I am writing again to ensure my view is heard re the planning application for Sizewell C.

The jobs created for locals will be short term, low wage and will lead to the loss of an enormous number of sustainable employment through the loss in tourism due to the taking over the area by a huge construction site.

We need sustainable energy now, and this is where taxpayers money should go, not on a massive build of a power station that will take a very long time to come on line and a lot longer to work off all the CO2 emissions created.

We have some of the worst biodiversity in the world here in the UK, so to build on and right next to such a range of habitats is wrong.

Thank you for your kind attention

Joanna Atherton
