This is not new or even news but nonetheless very important.

SZC will without question ruin part of East Suffolk: the plethora of proposed concrete, the aggregate lorries day in day out for three years, the Greg water tankers day in day out for three years, the ruination of Minsmere and what is a beautiful habitat for rare birds and animals, the effect of 24/7 white light over the largest building site in Europe, the problems of an eroding coastline, the influx of thousands of people for whom there is no support fabric and neither will there be, tourism and jobs list, lorry parks, hotels, park and ride tarmac, fifteen years of horror in an area that cannot sustain the horror.
