Sizewell C is NOT the answer to Britain's energy needs.

The technology is unproven, way too expensive, dangerous and most immorally leaves a spent-fuel legacy for countless future generations.

The smaller Rolls-Royce modular reactors are more feasible if nuclear has to be pursued.

This is an Suffolk Coast & Heaths Area of Outstanding Natural Beauty. It is an insult to suggest Sizewell C being built in such a precious and increasingly rare area.

British consumers will NOT wear their energy bills being loaded with even more costs from unproven, foreign, nuclear energy firms.

The East Suffolk coast is a very delicate environments that would be ruined by having Europe's biggest building site located there for nigh on a decade.

There are v rare Barbastelle Bats, Bitterns, owls, ant-lions etc in the neighbourhood that would suffer, move or die out.

EDF's claim about job-creation is a cynical canard as most jobs would be those relocated from Hinkley.

We must not allow the French – who are sabotaging the UK with their fishing, energy, migration and Brexit-punishment policies – control our energy supply.
