To whom it may concern

I wish to show my concern with the expected 1000 + traffic (EDF figures) that will be expected to use the B1078 to reach the Southern Park and Ride just North of Wickham Market. Using a narrow B road for this many additional cars and light vans will cause havoc in Coddendam, Clopton, Charsfield and in particular the Lower High Street in Wickham Market.

Why can't people who intend use the Park and Ride be issued with a vehicle window tag that can be identified somewhere on the A12 before and after the Park and Ride to ensure they use the A12 main road rather than this minor country B route.

EDF are currently talking to Wickham Market Parish Council about all sorts of changes that will remove parking for residents in the High Street and other areas of the village. These changes are not proven to help relieve traffic concerns or pollution in this part of Wickham Market and to my mind may only achieve more congestion. Why can't these changes be tested with moveable barriers to prove they work before implementing expensive and permanent structures.

Yours sincerely

George Hering -
