Dear Sir/Madam or To Whom It May Concern,

I would like to express an extreme objection to the building of Sizewell C. This is NOT GREEN ENERGY. This is NOT HELPING OUR ENVIRONMENT. Do you realise you are becoming the villains of the future? Do you realising you are ruining the future of your children and grandchildren? You do realise £20 + billion could be spent on saving the planet...not ruining the world around you. You are also killing the land around Sizewell. You are filling undisturbed Suffolk land with waste that will be radioactive for 100000 years. Why. How could you even dream of ruining the environment and coast around us. How could you dream of KILLING habitats. KILLING Suffolk. Please, don't ruin the world I love. Please.

Just remember, if you go ahead, you are the villains of suffolk. You are covering your eyes to the evidence in front of you. You are ruining AONB. We know who we'll blame when the Suffolk coastline is being destroyed. We know who's names to pass on because they left radioactive waste in suffolk for 100000 years.

You.

Thank you so much for reading. And again, please don't make Sizewell C go ahead.

Yours,

Roddy McMorran
