Dear sir madam

I am e en less con nced of he me its of the Sizewell C proposal now than 6 mon hs ago. This is due to a number of outstanding concerns I ha e as a local resident.
Befo e allowing he build to go ahead I would like you to cons der the follow ng

* Lack of a secured long term wa er supply
* concern about he impac s of a water desalinat on plant during construction
* uncertainty about coastal defences amid new reports wa n ng of sea le el r se (https /gbr01.safel nks protect on outlook.com/?url=h tps%3A%2F%2Fwww chathamhouse.org%2F. .%2F2021-09-1 -climate&amp da a=0 %7C01%7Csizewellc% 0planninginspectorate go .uk%7Cfc83c 289 a0 71b717208d98ccd2 7a%7C5878df986f88 8ab9322998ce557088d%7C0%7C0%7C63769563 9762 5912%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC wLjAwMDA LCJQIjoiV2luMzIiLCJBT I6Ik1haWwiLCJXVCI6Mn0%3D%7C1000&amp sda a=ZJCPfVDVrKJEZKrsNRtp2u5Dbkc Y 1ldAEFcrLNbuM%3D&amp reser ed=0 ..)
* d spute o er he contr but on (or no) to Biodi e sity Net Gain.

Not forgetting
* Traff c and dis upt on
* Impact on local bus ness
* In lux of worke s
* Loss of rare habi at etc

By the t me this nuclear disas er is completed renewable energy will ha e progressed and be e en more a ailable han t is now. If the money planned on being n ested in Sizewell C was redirected n o renewable energy then we could power homes without ha ing to disrupt a local economy nature reser e tour st ndustry e c.

Thank you for reading my concerns.

Your faithfully
Ellen Ell s
