[REDACTED]

Dear Planning Inspectorate,

I would like to add my voice to the chorus of condemnation heaped on the completely unworkable projects, Sizewell C & D.

The technology is untried, the site is unstable and the roadbuilding and closure of rights of way as planned are untenable and out of all proportion to the benefits promised twenty years down the line.

Fourthly the effect on the fragile habitats *throughout Suffolk* and beyond is completely unacceptable. Net Gain is an empty pair of buzzwords that mean nothing without the engagement of the majority of the people in this area. This is not forthcoming and presenting the Fission Reactor as a wonderful 'carbon free' technology is simply misleading.

Getting young people posing in hard hats and hi viz jackets is also misleading in my opinion and if people ever learned the truth about working on *decommissioning* nuclear power stations they would never, ever support this scheme to commission a pair of untried reactors.

Yours Faithfully
Keyes
