

Response to Secretary of State's Request for Information

On behalf of
20025843 St Peter's Church

The Parochial Church Council of St Peter's church Theberton is concerned that the structure of St Peter's (grade 1 listed) which is a few yards from the B1122 will be damaged by the vibration of construction traffic.

If the Sizewell link road (SLR) is not built ahead of construction then there will be hundreds of HGV's buses, vans and cars passing within yards of the ancient building every day. Laden lorries will labour up the hill toward the site and empty ones will "bounce" back .

The noise that this will create will impact on the quiet space in our church which visitors comment upon in the visitors book. Services will be disrupted.

However if built, the ill conceived route of the SLR will sever our communities. The stopping up of local roads will make it difficult for parishioners to access local services, their friends and church forcing them to use their cars for short journeys that would have either been walked or cycled.
