I am exceptionally concerned about this development as a local resident who also works from home a lot of the time. I need to get out and about for work a lot and the roads in and out of my village (Eastbridge) are single track, often making it impossible to pass and involving long reversing. The extra volume of traffic from the proposed Campus is a horrendous project as is the likely amount of traffic on the already small B roads around the area. We just don't have the infrastructure to support a massive construction project
