---

I would like to add my comments regarding the proposed siting of Sizewell C. I have concern regarding the environmental impact to the local area including;

The increased traffic volumes on the unimproved B1122, including congestion, noise, pollution and the resulting dangers to public safety with no link road in place and lack of park and ride.

The impact to local wildlife including RSPB Minsmere, the RSPB have said to date they have not been provided with sufficient information, which is a great concern. Also the impact to Sizewell Marsh an area of historical interest and the lack of plans for flood defence until 2140.

Value for money - to date a 3 fold interest on cost has to be a huge concern given the constraints on the public purse and the over spend on recent projects including Crossrail and HS2 does not bode well.

Ann Pether
