

Mynydd y Gwynt Limited

Mynydd y Gwynt Wind Farm

Consultation Report Appendix 32

Document Reference: MYG-AD-5-APP32

Required document as set out in Section 37(3)(c) of the Planning Act 2008

July 2014

Author: Mynydd y Gwynt Limited

Section 47 Consultation Responses

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y/N?	Regard had to response (s49)
1	Dave Thomas	07.10.2010		Consultation	Question asked in relation to: - When and where public exhibitions connected with proposed development will be held	N	Responded 17.06.2011: - Responded with times, dates and locations of upcoming public exhibitions
2	Steve Packer Powys County Council	26.11.2010		Consultation	Made views known in relation to: - Comment from Powys County Council on the Statement of Community Consultation	Y	- All Powys comments were incorporated into SOCC
3	Gillian Walker	26.05.2011		Objection	Basis of objection: - Despoliation of countryside - Taxpayer subsidies to wind energy	N	Responded 27.05.2011: - Noted that comments would be considered as part of the consultation process Letter was one of objection and did not raise specific issues which the team could address.
4	Richard Beale	27.05.2011		Request for information	Question asked in relation to: - Grid connection	N	Responded 14.06.2011: - Noted that the link will be on wooden poles along the A44 corridor to Llanidloes. However, the ultimate route is dependent on the location of

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y / N ?	Regard had to response (s49)
5	Andrew Mason	28.05.2011		Objection	Made views known in relation to: <ul style="list-style-type: none"> - Efficiency of wind energy - Despoliation of countryside - Impact on road network 	N	a new electricity substation, which is a matter for SP Manweb and the National Grid - Letter simply requested information. Responded 01.06.2011: - Letter was one of objection on principle, no change would have accommodated concerns.
6	Ginny Taylor	29.05.2011		Request for informaiton	Question asked in relation to: <ul style="list-style-type: none"> - Where was the privacy policy on the Mynydd y Gwynt website 	N	Responded 14.06.2011: - Response sent with link to the privacy policy. Request for information, no change required. Responded 01.06.2011: - Noted that comments would be considered as part of the consultation process - Letter was an objection on principle, no change would have accommodated concerns.
7	Julie Milne	31.05.2011		Objection	Made views known in relation to: <ul style="list-style-type: none"> - Cumulative impact - Impact on road network - Impact on tourism - Grid connection 	N	Responded 14.06.2011: - Noted that the link will be on wooden poles along the A44 corridor to Llanidloes. However, the ultimate route is dependent on the location of
8	Dave Thomas	31.05.2011		Request for informaiton	Made views known in relation to: <ul style="list-style-type: none"> - Cumulative impact Question asked in relation to: <ul style="list-style-type: none"> - Grid connection 	N	

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y/N?	Regard had to response (s49)
9	Martin Pearce	31.05.2011		Objection	<p>Questions asked in relation to:</p> <ul style="list-style-type: none"> - Grid connection - Health & Safety issues surrounding grid extension 	N	<p>a new electricity substation, which is a matter for SP Manweb and the National Grid as their work form part of a separate application</p> <p>No changes made as grid route is outside applicant's control</p> <p>Responded 14.06.2011:</p> <ul style="list-style-type: none"> - Noted that the link will be on wooden poles along the A44 corridor to Llanidloes. However, the ultimate route is dependent on the location of a new electricity substation, which is a matter for SP Manweb and the National Grid - With regards to the Health & Safety query, Mr Pearce was advised to contact SP Manweb and National Grid as their work will form part of a separate application to the IPC <p>Health assessment included in ES which deals with EMF from within the wind farm. ES unable to address issues to do with health impacts of high voltage network</p>

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y/N?	Regard had to response (s49)
10	Bryn Over	31.05.2011		Request for information	<p>Questions asked in relation to:</p> <ul style="list-style-type: none"> - Grid connection - Where the power generated will be used - Consultation process 	N	<p>Responded 14.06.2011:</p> <ul style="list-style-type: none"> - Noted that the link will be on wooden poles along the A44 corridor to Llanidloes. However, the ultimate route is dependent on the location of a new electricity substation, which is a matter for SP Manweb and the National Grid - Stated that provided there is demand locally, the energy will supply the demand. However, if there is no demand locally then it will go into the grid - Noted times and dates of forthcoming public exhibitions in Llangurig and Ponterwyd <p>Consultation requested data so no changes required.</p>
11	Sarah Faulkner	31.05.2011		Suggestions for scope of ES	<p>Questions asked in relation to:</p> <ul style="list-style-type: none"> - Grid connection - Impact on peat bogs - Consultation process - Requested ES considers cumulative impact of Grid extension 	Y	<p>Responded 14.06.2011:</p> <ul style="list-style-type: none"> - Noted that the link will be on wooden poles along the A44 corridor to Llanidloes. However, the ultimate route is dependent on the location of a new electricity substation, which is

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y / N ?	Regard had to response (s49)
					<p>of 400 kva network</p> <ul style="list-style-type: none"> - Health impacts 		<p>a matter for SP Manweb and the National Grid.</p> <ul style="list-style-type: none"> - Furthermore, as many of the issues raised in the letter were connected with the National Grid, these would be dealt with as part of a separate application to the IPC - Stated that a small amount of peat bog would be affected but the layout has been planned to minimise this impact. As much of the mire and wet heath habitat on site is in a poor condition and it is planned through a management plan to improve the habitat quality of some of these areas, this could comprise appropriate mitigation for any lost habitat - Made it clear that adequate maps of the proposed site would be provided as part of the consultation process and would be widely available online, in newsletters, public libraries and county offices. Also, all contact is to

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y / N ?	Regard had to response (s49)
12	Linda Davies	31.05.2011		Objection	<p>Questions asked in relation to:</p> <ul style="list-style-type: none"> - Transportation route - Visual impact - Grid connection - Rights of way - Cumulative impact - Location of site outside TAN8 SSA - Proximity to Red Kite breeding station - Carbon cost of construction of site - Decommissioning - Health & Safety during operational lifetime of site 	N	<p>be welcomed and can be made via numerous forms of communication</p> <p>Scope of ES included issues raised by respondent including health assessment. Some issues relating to the grid were not covered in ES as outside the control of applicant.</p> <p>Responded 20.06.2011:</p> <p>Response was primarily a request for data / information, no changes necessary.</p> <ul style="list-style-type: none"> - Referred Mrs Davies to the Preliminary Environmental Statement on website and noted that details of transport assessment will form part of the final Environmental Statement. Though, at present it is anticipated that the transport route will be from Swansea and will involve 189 abnormal loads over a construction period of 56 weeks - Visual assessment shows that significant effects on visual amenity

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y / N ?	Regard had to response (s49)
							<p>are possible within a few kilometres of the site (up to 6.5km). At greater distances, the levels of effect drop away from slight to negligible</p> <ul style="list-style-type: none"> - Noted that the link will be on wooden poles along the A44 corridor to Llanidloes. However, the ultimate route is dependent on the location of a new electricity substation, which is a matter for SP Manweb and the National Grid - It is not anticipated that use of any paths will be affected by the proposed development. However, paths may be fenced during the construction process to protect walkers and if any will need to be temporarily closed, alternative routes will be provided and clearly signposted. Appropriate consultation would be carried out with the local authority and Ramblers Association - In terms of cumulative impact the nearest operational wind farm is

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y/N?	Regard had to response (s49)
							<p>4.3km (Cefn Croes) away, with the next closest being just over 10km distant (Bryn Titli)</p> <ul style="list-style-type: none"> - The site is situated just outside the nearest SSA, Area D, as identified in TAN8 by the Welsh Government. The area was not initially considered viable because the Ministry of Defence used the area for flying practice. However, the Ministry of Defence have since withdrawn their objection and when the application is judged against the Welsh Government's TAN8 criteria, the site is believed to be eminently suitable for significant wind farm development - The nearest Red Kite feeding station is 10 miles east at Bwlch Nant yr Arian; while Gigrin Red Kite Centre in Rhayader is 21 miles away - According to the British Wind Energy Association, the average wind farm will pay back the energy used in its manufacture within 3-5 months of

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y / N ?	Regard had to response (s49)
13	Kim Neal St Harmon Community Council	08.06.2011		Consultation	Request for copies of consultation documents	N	operation. Furthermore, wind energy is a form of development which is essentially reversible – in contrast to fossil fuel or nuclear power stations - Mynydd y Gwynt Ltd will be responsible for all operational matters, including decommissioning. Dismantling the Mynydd y Gwynt wind farm would generate 7,991 tonnes of removable, recyclable material, mostly the steel used in the turbine towers - Mynydd y Gwynt Ltd will be responsible for all operational matters and compliance with the relevant regulatory authorities and legislation Request was for information which was provided.
14	Julie Milne	12.06.2011		General Objection	Made views known in relation to: - Impact on road network - Impact on local economy	N	Responded 17.06.2011: Noted that comments would be considered

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y/N?	Regard had to response (s49)
15	Carole O'Reilly	13.06.2011		Request for information	<ul style="list-style-type: none"> - Impact on tourism - Impact on health and social welfare - Impact on nature and ecology - Flooding - Effect on RAF practice area - Despoliation of countryside <p>Questions asked in relation to:</p> <ul style="list-style-type: none"> - Size of turbines - How much energy is expected to be delivered to the grid 	N	<p>as part of the consultation process</p> <p>Response was a general objection, no changes requested.</p> <p>Responded 07.07.2011: No changes made as request was provision of information.</p> <ul style="list-style-type: none"> - Exact height yet to be determined although assessment is based on a Vestas V90 turbine which is rated at 3MW, with a 80m to hub height and the blades having a maximum swept diameter of 90m. The maximum height to blade tip would be 125m - Turbines would deliver a maximum 81MW per hour in the National Grid with calculations by Vestas indicating a capacity factor of over 33%. This means an annual output in the region of 234GW

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y/N?	Regard had to response (s49)
16	Michelle Lloyd	14.06.2011		Scoping	<p>Questions asked in relation to:</p> <ul style="list-style-type: none"> - Whether Mynydd y Gwynt has completed a scoping report and if so, when was this done and what was Powys County Council's response 	N	<p>Responded 07.07.2011:</p> <ul style="list-style-type: none"> - Confirmed that scoping report was completed and submitted in 2004/5, but no response was received from Powys County Council. Notes that due to size of proposal the application will be dealt with by the UK's Infrastructure Planning Commission
17	K.D and B.M Holland	14.06.2011		Objection	<p>Made views known in relation to:</p> <ul style="list-style-type: none"> - Despoliation of countryside - Cumulative impact - Efficiency of wind energy - Grid connection 	N	<p>Responded 27.06.2011:</p> <p>Noted that comments would be considered as part of the consultation process, but due to the nature of objection, little could be done to accommodate their views.</p>
18	G. Foulkes	14.06.2011		SOCC	<p>Complaint to Powys CC about failure of applicant to provide copy of SOCC</p>	N	<p>Responded 16.06.2011:</p> <ul style="list-style-type: none"> - Apologised for not contacting them personally about the public consultation - Outlined the ways consultation has been advertised online and in print - Enclosed a copy of the Statement of Community Consultation, Proposal Summary Document, Newsletter and

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y/N?	Regard had to response (s49)
19	Jane and Julian Walford	16.06.2011		Scoping	Requested ES to consider cumulative impact of grid connection and that consultations zones extended to include them. -	N	<p>consultation response card</p> <ul style="list-style-type: none"> - Advised on times, dates and locations of upcoming public exhibitions <p>The complaint was remedied but no changes were required to the scheme.</p> <p>Responded 19.07.2011:</p> <ul style="list-style-type: none"> - Noted that the link will be on wooden poles along the A44 corridor to Llanidloes. However, the ultimate route is dependent on the location of a new electricity substation, which is a matter for SP Manweb and the National Grid - Stated that consultation process was agreed following extensive discussions with Powys County Council officials and that information regarding the Statement of Community Consultation has been available through various outlets. <p>No changes made as Grid extension is subject to its own consent procedures.</p>

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y / N ?	Regard had to response (s49)
20	B. J. Crone	16.06.2011		Request for information	Question asked in relation to: - Grid connection	N	Responded 06.07.2011: As this was a request for information, no changes made. - Noted that the link will be on wooden poles along the A44 corridor to Llanidloes. However, the ultimate route is dependent on the location of a new electricity substation, which is a matter for SP Manweb and the National Grid
21	Jiri George Novak	17.06.2011		Comment	Made views known in relation to: - Despoliation of countryside Question asked in relation to: - Consultation process	N	Responded 20.06.2011: - Stated times, dates and locations of upcoming public exhibitions and confirmed that there was no need to arrange special time for visit to the exhibition No request for changes made.
22	Jon Masterson	22.06.2011		Objection	Questions asked in relation to: - Location of site outside TAN8 SSA - Grid connection - Community benefits - Visual impact - Noise pollution	N	Responded 20.07.2011: - Stated that Wales has not yet reached Welsh Government targets for reductions in greenhouse gas emissions - Noted that the link will be on wooden

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y/N?	Regard had to response (s49)
					<ul style="list-style-type: none"> - Cumulative impact 		<p>poles along the A44 corridor to Llanidloes. However, the ultimate route is dependent on the location of a new electricity substation, which is a matter for SP Manweb and the National Grid</p> <ul style="list-style-type: none"> - Pointed out that photomontages and wireframe computer modelling will be available at the upcoming public exhibitions, on the Mynydd y Gwynt website and in the final Environmental Impact Assessment - Calculations by the turbine manufacturer show that the proposed site will meet UK government noise standards. <p>No specific changes requested by this response, but scope of ES was reviewed to ensure issues were addressed where practicable.</p>

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y / N ?	Regard had to response (s49)
23	Richard Bonfield	22.06.2011		Request for information	<p>Questions asked in relation to:</p> <ul style="list-style-type: none"> - Transportation route and loads - Size of proposed site - Visual impact - Grid connection - Cumulative impact - Location of site outside TAN8 SSA - Proximity to Red Kite breeding station - Carbon cost of construction of site - Decommissioning 	N	<p>Responded 19.07.2011:</p> <p>Information provided as requested:</p> <ul style="list-style-type: none"> - Referred Mr Bonfield to the Preliminary Environmental Statement on website and noted that details of final transport assessment will form part of the final Environmental Statement. Though at present it is anticipated that the transport route will be from Swansea and involve 189 abnormal loads over a construction period of 56 weeks. Pointed out that still in discussions with Welsh Government over preferred transport route and will notify of progress via website - Outlined the dimensions of the abnormal loads involved in the transportation of the turbines - Provided a detailed analysis of how the projected number of lorry movements was calculated - States that the proposed site will

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y/N?	Regard had to response (s49)
							<p>cover 585 hectares on the eastern side of the Manod Estate</p> <ul style="list-style-type: none"> - Visual assessment shows that significant effects on visual amenity are possible within a few kilometres of the site (up to 6.5km). At greater distances, the levels of effect drop away from slight to negligible - Noted that the link will be on wooden poles along the A44 corridor to Llanidloes. However, the ultimate route is dependent on the location of a new electricity substation, which is a matter for SP Manweb and the National Grid - Confirmed that discussions are at an advanced stage with SP Manweb with regards to entering into a grid connection agreement. However, cumulative impact of grid connection is a matter for National Grid and SP Manweb - It is not anticipated that use of any paths will be affected by the

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y/N?	Regard had to response (s49)
							<p>proposed development. However, paths may be fenced during the construction process to protect walkers and if any will need to be temporarily closed, alternative routes will be provided and clearly signposted. Appropriate consultation would be carried out with the local authority and Ramblers Association</p> <ul style="list-style-type: none"> - In terms of cumulative impact the nearest operational wind farm is 4.3km (Cefn Croes) away, with the next closest being just over 10km distant (Bryn Titli). Furthermore, the minimum distance between Mynydd y Gwynt and the proposed Nant y Moch scheme is 5.5km with the current proposal being approximately 7km apart - Turbines will be remotely located and are visible from only a few viewpoints. A zone of theoretical visibility is available on the Mynydd y Gwynt website

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y/N?	Regard had to response (s49)
							<ul style="list-style-type: none"> - The site is situated just outside the nearest SSA, Area D, as identified in TAN8 by the Welsh Government. The location was not initially considered viable because the Ministry of Defence used the area for flying practice. However, the Ministry of Defence have since withdrawn their objection and when the application is judged against the Welsh Government's TAN8 criteria, the site is believed to be eminently suitable for significant wind farm development - The nearest Red Kite feeding station is 10 miles east at Bwlch Nant yr Arian; while Gigrin Red Kite Centre in Rhayader is 21 miles away. - Fifty species of birds were recorded during the non-breeding bird survey and 28 species of birds during the breeding bird survey. Early surveys recorded one pair of breeding Snipe and two to three pairs of breeding

Ref.	Consultee	Date consulted	Response deadline	Topic	Summary of response	Change Y/N?	Regard had to response (s49)
							<p>curlew</p> <ul style="list-style-type: none"> - According to the British Wind Energy Association, the average wind farm will pay back the energy used in its manufacture within 3-5 months of operation. Furthermore, wind energy is a form of development which is essentially reversible – in contrast to fossil fuel or nuclear power stations. Even by taking into account the carbon costs of all other works (manufacture, transport etc.) there is no doubt that wind farms offer significant carbon savings - Mynydd y Gwynt Ltd will be responsible for all operational matters, including decommissioning. Dismantling the Mynydd y Gwynt wind farm would generate 7,991 tonnes of removable, recyclable material, mostly the steel used in the turbine towers - Decommissioning work has not been factored into the carbon cost of the
