Subject: Re: North Killingholme Development Consent Order - Consultation

Dear Philip

Please accept my apologies for the long delay in getting back to you. I needed to schedule a good block of time to review the submitted update survey information.

I can confirm my view that the survey methods used and the survey effort deployed are appropriate for the site in question. The surveys have been consistent with our previous discussions, notably on 24 September 2019.

A few comments follow:

- I note that the proposed DCO amendments relate primarily to an extension in time and a move away from carbon capture and storage- there are no other physical change set the proposals.
- I welcome the fact that air quality impacts are likely to be lower than previously thought.
- Given the confirmed presence of a bat roost in building B5, the Planning Inspectorate will need to consider the 3 tests of European Protected Species licensing.
- I note that survey results for habitats, birds (breeding, passage, wintering), reptiles, great crested newts, badgers, water voles and otter do not present any real need for changes to the DCO as previously approved.
- I note that reptiles and great crested newts are likely to be absent.
- I support the continued imposition of requirements to secure environmental control measure such as the adoption and implementation of a Construction Environmental Management Plan (CEMP), the use of oil interceptors, the containment of liquids and controls on noise and light pollution.
- I also support the continued imposition of requirements to secure impact avoidance, mitigation and biodiversity enhancement measures for birds, bats, badgers, water voles and otter.
- I note that drain W2, with previous records of water vole, was found to have been greatly disturbed during one of the surveys. It would be helpful to ensure that control measures are put in place to avoid any future water vole habitat disturbance, except as approved with the appropriate mitigation measures.

I hope this helps.

Kind regards

Hi Andrew,

Thanks for getting back to me on this.

I have uploaded the Ecology reports to the WETransfer Site (thinking that would be more efficient as you are used to using it).

Can you please let me know once received? Could you please also let me know when you think you would be able to look at these? I'd be happy to talk through any aspects on the phone if helpful.

Kind Regards,

Phil

Please note I am on annual leave on the 8th June

Hi Phil

That should work. Alternatively, we use WeTransfer for this sort of thing:

<https://wetransfer.com/>

Hi Andrew,

I hope you are keeping well through the lockdown.

Following completion of the last Ecology surveys in April, we have now collated the results of all the ecology surveys and produced the corresponding reports.

Could you please clarify how best to send these to you? Some of the reports are over 10MB in size and cannot be compressed further, so we didn't want to just email them to you in case they wouldn't get through.

We could put them onto our FTP site and send you a link to download if that would be suitable?

Kind Regards,

Phil

Hi Andrew,

Sorry, the internet stopped us there I think.

Could you possibly call me on my mobile number, below?

Otherwise if there is a direct number I can reach you on, I would be happy to call you.

Kind Regards,

Phil

Good morning Andrew,

Ahead of today's call at 10:00, please see attached a summary of the ecological surveys and assessments that have been carried out to date to support the North Killingholme Power Project DCO.

Thanks,
Lloyd

Hi Andrew,

Sorry for the delay in coming back to you. As Friday (tomorrow) is seemingly unsuitable for you, can we schedule a call with yourself on Monday (23rd)? The morning would be great if that works for you.

In the meantime we will issue you a short document summarising the ecological survey and assessment work that has been carried out to date to support the proposed scheme. If you have any queries, do let us know.

Thanks,
Lloyd

Morning Andrew,

Thank you for getting back to us.

We are limited for availability today I'm afraid, would a call on next week suit?

Kind Regards,

Phil

Philip & Lloyd

Apologies for the delay in replying- it's a very busy time for us.

How about 10 am on Friday?

To aid the discussion, it would be useful if you could send in advance a summary of the previous survey work, along with any proposed changes or updates.

Also Good morning Andrew,

Just to echo Lloyd and say that we would welcome your input on this. I have also added Ben from CGen into this email chain, so he is kept aware of all correspondence with the LPA relating to the project.

Kind Regards,

Phil

Good morning Andrew,

I hope all is well.

I have left you a voicemail but thought I'd follow it up with this email. As per the email chain below, myself and Philip Davidson are progressing the ecological elements associated with the North Killingholme Power Project DCO. If we could schedule a call with you to discuss our current ecological scope for the project it would be greatly appreciated. However, if this isn't achievable do let myself or Phil know and we can look at alternative options for reviewing and agreeing our survey programme.

Thanks,
Lloyd

Dear Andrew,

I have also left you a voicemail, but thought an email would be helpful as a follow-up.

I am part of the team working with CGen looking at the possible amendment of the North Killingholme Power Project DCO. Myself and my colleague Lloyd are looking at the ecology aspects, including delivering surveys to provide updated baseline information.

Following initial meetings between North Lincs and the project team earlier in August, we would like to review our proposed scope of ecology works with you, with a view to agreeing the works that are likely to be needed to support an amendment to the DCO.

A telephone call seemed like a good way to start; is there a day and time that would be good for me to give you a ring? Please let me know if you have any immediate queries, also.

Kind Regards,

Phil
