

Dogger Bank Teesside A&B Document Library

This document library relates to the Dogger Bank Teesside A&B Offshore Wind Farm application. The library lists each document that has been submitted to the examination by any party and documents that have been issued by the Inspectorate. All documents listed have been published to the National Infrastructures pages of the Planning Portal and a hyperlink is provided for each document. A unique reference is given to each document, these references have been used within the Report on the Implications for European Sites as issued by the Inspectorate and will be used in the Examining Authorities Recommendation Report. The documents within the library are categorised either by document type or by the deadline to which they are submitted.

Please note the following:

- This is a working document and will be updated periodically as the examination progresses.
- Every attempt will be made to retain the current references and structure, however any element of the document may be amended at any time.
- The categorisation does not necessarily reflect the way that the documents are categorised on the project page of the National Infrastructure Planning Portal website.
- Advice under Section 51 of the Planning Act 2008 that has been issued by the Inspectorate is published to the National Infrastructure Website but is not included within the library as such advice is not an examination document.
- Certain documents may be duplicated so that they appear in the list within multiple sections, however each document has a unique reference.

- This document only contains reference to documents submitted from the point of the submission of the application, therefore documents submitted to the Inspectorate or issued by the Inspectorate during the pre-application stage will not appear.
- Reference numbers may not be sequential.
- The order of documents within each sub-section is either random, chronological, numerical or alphabetical and confers no priority or higher status on those that have been listed first.
