Dear Sirs

**The Dogger Bank Teesside A Offshore Wind Farm Order 2015 – Application for a Non-Material Change**

We have received a letter dated 27 November 2019 from Doggerbank Offshore Wind Farm Project 3 Projco Limited (the "Project Company") regarding an application for a non-material change to The Dogger Bank Creyke Beck Offshore Wind Farm Order 2015 (SI 2015/1592) that was made on 4 August 2015 and subsequently amended by SI 2019/699 (collectively the "DCO").

The Crown Estate was previously consulted by the Project Company on the DCO and the subsequent amendment. We are therefore being formally consulted on the current proposed amendment to replace the stated gross output capacity in the DCO of up to 1.2 gigawatts to a gross electrical output capacity of more than 100 megawatts and to increase the maximum permitted wind turbine generator rotor diameter to 280m from 215m.

We understand that this requested change will not require any other changes to the offshore design parameters stated in the DCO such as the number of turbines, nor the total rotor swept area. As this proposed amendment to the DCO will maximise the output of the project with no greater environmental effect than previously assessed we are supportive of the non-material change to the DCO.

The Crown Estate does not have any objection to the proposed amendment in this application to the Teesside A Offshore Wind Farm DCO.

Yours faithfully

  
Stuart Curry
