Dear Sirs

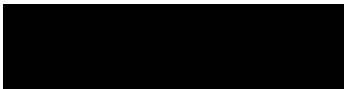

**Dogger Bank Teesside A Offshore Wind Farm Project – Non-material change application to Development Consent Order**

We have received a letter from Dogger Bank Wind Farm in relation to the Teesside A and B Offshore Wind Order 2015 (the “DCO”) regarding an application for a non-material change to the DCO.

The changes relate to: (a) increase in maximum hammer energy for monopoles from 3,000 kJ up to 4,000 kJ for the wind turbine generators and (b) changes to clarify the inter-array cables may be laid directly between the turbine generators and the offshore platforms, as well as between the offshore platforms.

The Crown Estate does not have any objection to the proposed changes to the DCO.

Yours faithfully

Louise Rich  
Senior Development Manager Offshore Wind
