**Subject:** Wrexham Energy Centre Proposal - Hearings - 28th & 29th September  
**Date:** 19 September 2016 08:21:27

---

Dear Sirs,

I would very much like to have been able to attend and speak at these hearings but unfortunately I am away in Scotland all that week. However, I trust that my principal objection is now well documented and taken on board – namely that such power stations should be situated on the sites of the former closed or about to be closed power coal or oil fired power stations where there would be no adverse environmental impact and the existing infrastructure is already in place.

I very much hope the examining officer will fully consider this fundamental and obvious objection before making any decision in respect of this ridiculous proposal. I note that the developer has tried to address this concern by stating that the costs of decommissioning such sites makes this unfeasible – this is very weak especially as they have just been granted a DCO on the site of a former coal fired power station at Stone, Staffordshire !!!

Yours,

Jonathan Young
