

Dear Sir,

Ref Application by Wrexham Power Ltd

At the public hearing on 27/28th September on of your subheading related to the historical use of the land the applicant produced photographic evidence that this land had previously been used with high rise development which was questioned by Councillor Morris and myself. You may recall the applicant then produced an ariel photograph of the site highlighting the boundary line in red.

I would first like to draw your attention to the ariel picture taken from Wrexham Power Limited booklet in which it is clear that they have made changes to the boundary to suit and now incorporate the land to the side of the proposed development.

These two plans taken from Wrexham Powers Leaflet clearly show the plan site marked in red which was different to the one shown at the public hearing 28/29th September 2016

I wish to draw your attention the two photographs clearly showing the high rise building in the background and point out that these were taken from No 3 and No 4 Marsh Lea which I hope will show you that these buildings were on the adjacent site to which Wrexham Power have adopted to validate their claim.

The Towers of the former Fibreglass Factory

The Towers of the former Fibreglass Factory

This Picture was taken from No 4 Marsh lea and shows the high structures in the south east

This is now the site of the new build at Marsh Lea Farm

This Picture was taken from the drive way of 3 Marsh Lea with the oak tree in the foreground

I find this deceitful attitude by the applicant very distasteful but only confirms the depths they will go to in order to further their claims and ride roughshod over anyone who is in their way.

Should this development be granted I will be looking towards the applicant for any devaluation which our property incurs due to the blight on the area.

Yours sincerely,

Dennis and Angela Edwards
