Dear sirs or madam I feel I must write to you to express my concerns about the proposed wind farm development the cables from this farm will come to shore through the very area I rely on to gather my shellfish and fish from which I make my living. In the past these cables and other works have not bothered us so much but this one will take all the grounds we use I have spoken to the developer which seemed to have little regard to my plight as the project is only in the survey stage at the moment which in turn will make it hard for us to work I feel I must make myself known to you and be consulted at all stages of the development I am not against the development but I need reassurance my way of life and income is not to the detriment of this wind park. The cables are the big concern at the moment and the survey work that is to start soon.
Kind Regards

Paul Lines

Dear sir or madam I feel I must write to you concerning the proposed wind farm development as the cables will come through the very seabed I get a living from this will ultimately destroy the ground and habitat the creatures i Pursue. I know the project is only at survey level at the moment but I feel I must be heard as in past projects fishermen have been cast aside and seen as a menace. My son and I have fished there for a long while and I am worried for the future

Kind Regards

Paul Lines
