3.4	Marine Management Organisation	N/A	MMO requests that this area is excluded from any dredge and disposal granted by this licence. Should dredge and sediment disposal become necessary in this area, additional marine licence applications will be required and onshore disposal considered. The MMO is in discussion with the developer to agree appropriate Deemed Marine Licence wording with regards to exclusion of this area from dredge and disposal consent. The MMO will seek resolution through the Statement of Common Ground (SoCG) process and will provide an update accordingly.	The following mitigation measure has included: <i>No licensed activities may take place within the restricted area [250m buffer around Site 30) until the MMO has confirmed in writing that it is satisfied with the results of a sediment sample survey [that will be undertaken by the Applicant] or that sufficient mitigation has been secured in the approved method statement required to be submitted under condition 13(1)(g) to prevent impacts from contaminated sediment.</i>
All	ExA	N/A	Schedule of mitigation will require updated due to changes in numbering in the DMLs	<i>References updated to reflect changes in number of draft order version 4 submitted at Deadline 6.</i>
