

**Additional justification for Offshore consultees that EATL do not propose to consult pursuant to regulation 7(3) of the 2011 Regulations**

<b>Consultee</b>		<b>Reasons for Excluding</b>	<b>Section 42 Consultee</b>	<b>Section 43 Consultee</b>	<b>Relevant Statutory Undertaker</b>
The Joint Nature Conservation Committee	JNCC	Offshore interest but no relevant representation received and statutory functions for offshore renewables matters delegated to Natural England. Natural England is proposed to be consulted on the proposed changes.			
	CEFAS	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
	Associated British Ports	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		Yes
	Harwich Haven Authority	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		Yes
	Port of Felixstowe	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		Yes
	Harwich International Port Limited	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		Yes
	NATS	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		Yes
Historic England (covers English Heritage)	Historic England	Offshore interest and relevant representation received but the proposed changes would not impact any of the areas noted in the relevant representation. Further, as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.  The non-material change was discussed with Historic England on 7 March 2019. Because of the limited changes to the project it was agreed with Historic England that they do not need to be consulted in relation to the non-material change.	Yes		
The Environment Agency and Relevant Waste Regulatory Authority	The Environment Agency	Offshore interest and relevant representation received but the proposed changes would not impact any of the areas noted in the relevant representation. Further, as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
The Maritime and Coastguard Agency	Maritime and Coastguard Agency	Offshore interest and relevant representation received but the proposed changes would not impact any of the areas noted in the relevant representation. Further, as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
The Civil Aviation Authority	CAA	Offshore interest and relevant representation received but the proposed changes would not impact any of the areas noted in the relevant representation. Further, as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
Trinity House	Trinity House	Offshore interest and relevant representation received but the proposed changes would not impact any of the areas noted in the relevant representation. Further, as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		

**Additional justification for Offshore consultees that EATL do not propose to consult pursuant to regulation 7(3) of the 2011 Regulations**

The Crown Estate Commissioners	The Crown Estate	Offshore interest and relevant representation received but the proposed changes would not impact any of the areas noted in the relevant representation. Further, as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed. The Crown Rights article (Article 37) will not change.  The non-material change was discussed with The Crown Estate on 27 February 2019. Because of the limited changes to the project it was agreed with The Crown Estate that they do not need to be consulted in relation to the non-material change.	Yes		
MOD	MOD	Offshore interest and no relevant representation received but the proposed changes will not alter any of the parameters used in the assessment and there will be no change to the impacts previously assessed. In addition, mitigation to avoid adverse effects on air defence radar is secured within the 2017 Order by Requirement 33 and this will not change.	Yes		
RSPB	RSPB Eastern England	Offshore interest and relevant representation received but the proposed changes would not impact any of the areas noted in the relevant representation. Further, as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
Royal Yachting Association	Royal Yachting Association	Offshore interest and relevant representation received but the proposed changes would not impact any of the areas noted in the relevant representation. Further, as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
RNLI	RNLI	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
National Federation of Fishermen's Organisations	National Federation of Fishermen's Organisations	The assessment for Commercial Fisheries is informed by the maximum number of WTGs, with minimum spacing requirement over a maximum area which in this case relates to the consented array Order limits. The maximum capacity of the windfarm and/or the maximum capacity of individual WTG, in themselves, do not inform the assessment. EATL can confirm that the maximum number of WTGs will not increase, nor will the minimum spacing requirements and maximum area of offshore development as secured in the 2017 Order. Therefore, the proposed amendments will not result in any additional impacts, or impacts of greater significance, than those described in the ES.	Yes		
The Secretary of State for Defence	Secretary of State for Defence	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
The Secretary of State for the Environment, Food and Rural Affairs	Secretary of State for Environment	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
Chamber of Shipping	Chamber of Shipping	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
ABP Port of Ipswich	ABP Port of Ipswich	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
SSE Galloper	SSE Galloper	Relevant representation was in support of the application and other comments focused on cable installation. The changes proposed do not impact any of the areas noted in the relevant representation and as the proposed parameters used in the assessment will not change there will be no change to the impacts previously assessed.	Yes		

**Additional justification for Offshore consultees that EATL do not propose to consult pursuant to regulation 7(3) of the 2011 Regulations**

Forewind	Forewind	Offshore interest and relevant representation received but the proposed changes would not impact any of the areas noted in the relevant representation. Further, as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
Aquaterra Energy	Aquaterra Energy	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
Hornsea	SmartWind Ltd (Hornsea)	Offshore interest and relevant representation received but the proposed changes would not impact any of the areas noted in the relevant representation. Further, as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
British Marine Aggregates	British Marine Aggregates	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
DFDS Seaways	DFDS Seaways	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
Eastern Sea Fisheries Joint Committee	Eastern Sea Fisheries Joint Com	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
Interconnector UK	Interconnector (UK) Limited	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
International Ports	International Ports	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
EuroShip Services Ltd	EuroShip Services Ltd	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
P & O Ferries	P & O Ferries	Offshore interest but no relevant representation received and as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
Transition Ipswich	Transition Ipswich	Relevant representation was in support of the application and the changes proposed do not impact any of the areas noted in the relevant representation. Further, as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.	Yes		
	DONG Energy	Offshore interest and relevant representation received but the proposed changes would not impact any of the areas noted in the relevant representation. Further, as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.			
	ENI	Offshore interest but there are agreed protective provisions which are included in the 2017 Order for the benefit of ENI. The protective provisions will not change.			
	Harwich Fishermen's Association	Offshore interest and no relevant representation received but the proposed changes will not alter any of the parameters used in the assessment and there will be no change to the impacts previously assessed. In addition, the maximum number of WTGs will not increase, and the minimum spacing requirements and maximum area of offshore development as secured in the 2017 Order will not change.			
	The Wildlife Trusts	Offshore interest and relevant representation in relation to marine mammals received. However, the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed. There will be no change to the maximum hammer energy which is secured within the 2017 Order.			

**Additional justification for Offshore consultees that EATL do not propose to consult pursuant to regulation 7(3) of the 2011 Regulations**

	Vattenfall Wind Power	Offshore interest and relevant representation received but the proposed changes would not impact any of the areas noted in the relevant representation. Further, as the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed.			
	WDC	Offshore interest and relevant representation in relation to marine mammals received. However, the proposed changes will not alter any of the parameters used in the assessment there will be no change to the impacts previously assessed. There will be no change to the maximum hammer energy which is secured within the 2017 Order.			
<b>Fishermen</b>		Offshore interest and no relevant representation received but the proposed changes will not alter any of the parameters used in the assessment and there will be no change to the impacts previously assessed. In addition, the maximum number of WTGs will not increase, and the minimum spacing requirements and maximum area of offshore development as secured in the 2017 Order will not change.			
<b>Transboundary</b>		Offshore interest and no relevant representation received but the proposed changes will not alter any of the parameters used in the assessment and there will be no change to the impacts previously assessed. In addition, the maximum number of WTGs will not increase, and the minimum spacing requirements and maximum area of offshore development as secured in the 2017 Order will not change.  In relation to marine mammals there will be no change to the maximum hammer energy which is secured within the 2017 Order.			
<b>Cable and Pipeline Operators</b>		No relevant representation received. Further, as the proposed changes will not alter any of the parameters used in the assessment and there is no change to the proposals for cable installation, there will be no change to the impacts previously assessed.
