Hi,

Please see below a further EA3 NMC consultation response from **The Wildlife Trusts**, can this please be logged.

Thanks
David

Dear Christie

Please accept my apologies for not responding sooner. No, on this occasion TWT will not be responding to this consultation, but I do welcome you checking.

Best wishes

Tania

Hi Tania,

I was just wondering if TWT intends to respond to the EA3 NMC?

Thanks,

Christie

Subject: East Anglia THREE Windfarm - Non Material Change Application

Hi Tania,

I hope this e-mail finds you well.

Following my previous correspondence in regards to the non-material change to the East Anglia THREE Offshore Windfarm and on behalf of East Anglia THREE Limited, I am getting in touch to formally submit our application to make a non-material change to the 2017 Order (as amended). The application has been submitted to the Department for Business, Energy and Industrial Strategy and also to the Marine Management Organisation regarding the associated application to vary the Deemed Marine Licences.

I have attached a letter which summarises this application along with the supporting documents. As detailed in the attached documentation, we have set a closing date for the consultation process of 30th September 2020 (as noted in the newspaper advert). It would be greatly appreciated if you could provide those in cc with a copy of any representations about the Application that you submit to the Planning Inspectorate. Please let me know if there is anything you wish to discuss in the meantime.

Please can you confirm receipt of this e-mail and the application documentation for our records.

Kind Regards

Christie

Hi Tania,

No problem at all. If approved the NMC would commit us to a reduced number of turbines, and therefore foundations. This would result in a reduction in overall underwater noise generated through EA3 offshore construction activities.

We have been slightly delayed in submitting the EA3 NMC application, but are working on finalising the documents and are hoping to lodge these with BEIS and key stakeholders in the coming weeks. In light of covid-19, we are planning on issuing electronic copies of the documents to stakeholders via email only. **Can you please confirm that you are happy to receive a copy of the application via this method?**

Many thanks,

Christie

Hi Christie

Apologies for the delay in responding to your email, and thanks for informing me about the NMC for East Anglia Three. Our main concerns would be any changes in underwater noise impacts on marine mammals and on the Southern North Sea SAC. Are you able to confirm if you expect any changes to underwater noise impacts?

With thanks

Tania

Subject: Notification of Upcoming East Anglia THREE Non-material Change Application

Hi Tania

East Anglia Three Limited (EATL) submitted an Application for Development Consent and associated Deemed Marine Licences for the East Anglia THREE Offshore Wind Farm in November 2015, with consent granted by the Secretary of State for the Department for Business, Energy and Industrial Strategy (BEIS) in August 2017. The East Anglia THREE Offshore Wind Farm Order 2017 (2017 Order) granted consent for the development of an offshore wind farm with a gross output of 1,200 Megawatt (MW) (1.2 Gigawatt (GW)), located 69 km off the coast of Suffolk. The 2017 Order consented up to 172 wind turbines and associated offshore infrastructure. The East Anglia THREE Offshore Wind Farm (Correction) Order 2018 was subsequently granted on 12 July 2018 to correct certain errors in the 2017 Order. EATL submitted a successful non-material change in 2019 in which amendments to the maximum generating capacity was granted from 1,200MW to 1,400MW.

In order to benefit from continuing technological developments in the offshore wind industry, some elements of the EA THREE design envelope, as secured in the 2017 Order (as amended) require amendment. We have undertaken a review of the proposed amendments, current consent and EIA documentation and have concluded that the amendments represent a non-material change to the DCO. EATL therefore intends to submit an application for a non-material change to the 2017 Order (as amended) in relation to the offshore works associated with the East Anglia THREE Windfarm.

The amendments relate to parameters associated with the wind turbine generators (WTG) and offshore substations (OSS) and importantly, include a significant reduction in the maximum number of both WTG's and OSS being installed. Please find attached a brief set of slides that we shared with BEIS recently that outlines the changes. The work carried out on the proposed amendments has concluded that these proposed amendments will not result in any changes to the conclusions of the EIA.

We have informed BEIS of our intention to submit a non-material change application and intend to submit the Regulation 7 notice identifying the list of consultees to BEIS by early next week. It is our intention to include the Wildlife Trusts in the Regulation 7 list of consultees that we intend to formally consult with on the application. I am therefore writing to you to confirm our intention to submit the relevant supporting information to you for comment around mid-June.

In advance of submitting the non-material change documentation, please let me know if you have any initial questions or want to discuss further and we can organise a call to discuss. Please let me know if you think this would be of benefit, and I can facilitate this.

Many thanks,

Christie
