Subject: s42 Consulation, Tata Steel Proposals

Afternoon Robert

Thank you for your time just now to discuss your response to GVA dated 24 February 2014 (ref P/14/39/OBS) regarding the internal power generation enhancement proposals at Port Talbot Steelworks. To confirm, that full details of the assessment on designated sites (including Kenfig National Nature Reserve) will be provided in the Environmental Statement. Viewpoint 8 will provide details of the potential landscape effects on Margam Burrows and Merthyr Mawr Historic Landscape.

I trust that this is sufficient for your records and please do not hesitate to contact the project should you have any further queries to the PEIR.

Kind Regards
Catherine
