

## **The Port Talbot Steelworks (Power Generation Enhancement) Order**

**DCO February 2015**

**Notes of Issue Specific Hearing 25<sup>th</sup> February 2015**

### **4.4.1 Standard for building design**

The authority confirmed that it is happy with the applicant's response regarding the noise standards to be applied to the building design. The authority will be looking to the environmental permit together with requirements 4 and 14 to secure the noise standards.

### **4.5 Ecological issues**

The authority confirmed that it was happy with the progress in relation to the translocation of species and the creation of sustainable habitats.

### **5. Any other matters**

Officers emphasised to the Hearing (as identified in its Written Representations) that Members of the authority had specifically requested that the matter of community benefit relating to the development be raised.

While the Authority acknowledge TATA's level of involvement in the community, nevertheless the above request is made in knowledge of such contributions and the authority is requesting a form of community benefit in addition to that set out by TATA in its written response.

It is noted that the applicant will engage in further discussions with the Authority, and that the Statement of Common Ground will record the nature of any agreement.
