

NATIONAL GRID WRITTEN REPRESENTATION

As set out in the relevant representation submitted, National Grid Electricity Transmission Plc and National Grid Gas Plc (together "National Grid") has infrastructure and land which is within or in close proximity to the proposed Order limits. National Grid's rights to retain its apparatus in situ and rights of access to inspect, maintain, renew and repair such apparatus located within or in close proximity to the Order limits should be maintained at all times and access to inspect and maintain such apparatus must not be restricted.

The Feeder 09 gas transmission pipeline (Feeder 09 - Peterborough to Whitwell) is included within the proposed Order limits for the purposes of a future gas connection application. The ZA 400kV Overhead Electricity Transmission Line (Grendon to Sundon) is also included within the proposed Order limits for the purposes of a future electricity connection.

As a responsible statutory undertaker, National Grid's primary concern is to meet its statutory obligations and ensure that any development does not impact in any adverse way upon those statutory obligations.

National Grid and the Applicant have agreed protective provisions to be included within the Order along with a confidential side agreement to ensure the protection of National Grid's land and apparatus. It is expected that this agreement will be completed shortly which will allow National Grid to withdraw its representations in relation to the Project. National Grid will update the Examining Authority in this regard.

Should the agreement not be concluded, National Grid reserves the right to make further representations as part of the examination process.
