Subject: Gwynedd Council's response to deadline 6

Dear Sir/Madam

Please find the following response by Gwynedd Council to a previous question by the ExA which was required by deadline 6:

2.10 The applicant has indicated [REP4-014, items 8.14 and 11.3] that various plans and an updated Schedule of Mitigation will be submitted at deadline 5. Please provide written comments on these by deadline 6, indicating whether you are satisfied that the necessary mitigation measures are covered appropriately.

Following on from the work started at the issue specific hearing and leading up to deadline 5, GC and the applicant have discussed and agreed on specific management plans covering air quality, construction noise and operational noise which contain mitigation measures as identified in the ES and any further mitigation measures identified during the examination process. Any additional mitigation measures which will be identified moving forward can also be incorporated into these plans.

If you require any further information, do not hesitate to contact the service.

I would be grateful if you could confirm receipt of this e-mail.

Yours sincerely

Glyn Llewelyn Gruffudd
