Subject: DNS - Glyn Rhonwy - DCO Non Material Change 2 - EN010072 - HSE Response dated 16/10/2023
Date: 16 October 2023 08:26:25

Dear Snowdonia Pumped Hydro Team

Thank you for your email dated 4 October 2023 consulting HSE on the Proposed Glyn Rhonwy DCO Non Material Change 2 - Development of National Significance (DNS).

Please find HSE's advice below.

HSE's land use planning advice

-

HSE's Land Use Planning Advice (CEM HD5 Contribution) – Approved Project

Will the proposed development fall within any of HSE's consultation distances?

With reference to the redline Order Limits boundary shown on 2.02_Existing_Site_Location_Plan_ISSUED [Reference: <https://www.snowdoniapumpedhydro.com/planning> Maps and Plans], the now approved project/development does not fall within the consultation distances of any Major Hazard Installation(s) or Major Accident Hazard Pipeline(s).

Would Hazardous Substances Consent be needed?

The presence of hazardous substances on, over or under land at or above set threshold quantities (Controlled Quantities) requires Hazardous Substances Consent (HSC) under the Planning (Hazardous Substances) Act 1990 as amended. The substances, alone or when aggregated with others, for which HSC is required, and the associated Controlled Quantities, are set out in The Planning (Hazardous Substances) (Wales) Regulations 2015.

Hazardous Substances Consent is required if the site is intending to store or use any of the Named Hazardous Substances or Categories of Substances and Preparations at or above the controlled quantities set out in schedule 1 of these Regulations.

Further information on HSC should be sought from the relevant Hazardous Substances Authority.

Explosives sites

There are no licensed explosive sites in the vicinity so HSE has no comment to make in this regard.

With Kind Regards

Shirley

Subject: HPE CM: DNS - Glyn Rhonwy - DCO Non Material Change 2 - EN010072 - Consultation document

Dear Sir / Madam,

We are contacting you by email as either you, your predecessor, or company have been identified as stakeholders for the Glyn Rhonwy Pumped Storage Development Consent Order (DCO) Application.

As background, the proposed Glyn Rhonwy Pumped Storage project is a 99.9 MW, 700 MWh Pumped Hydroelectric energy storage project in Llanberis, North Wales. The project was awarded a DCO in 2017 and was amended in 2021. Since that time we have been working to finalise development of the project prior to construction. However, due to unprecedented increases in construction costs associated with post Covid inflationary factors, and ongoing work on energy policy for support of Large-scale Long-duration Energy Storage, the development programme of the project has been impacted.

Consequently, we are applying to the Welsh Ministers for a Non-Material Amendment to the DCO to extend the commencement deadline by 24 months. This would allow us sufficient time to complete the various pre-commencement requirements specified by the DCO. This application seeks to change no aspect of the DCO other than the commencement date.

Full details of the application & consultation can be found on the attached Regulation 6 Notice. A hard copy of this notice has also been sent to your address. Where possible we have also sent this via email to the relevant stakeholders.

Kind Regards,

The Snowdonia Pumped Hydro Team
