

## Application for Development Consent for Nationally Significant Infrastructure Projects under the Planning Act 2008

\* required information

### Application Form

Please read guidance documents relating to the submission of applications prior to completing this form including [government guidance](#) and the Planning Inspectorate's [Advice Note Six: Preparation and submission of application documents](#).

\* Do you have a reference number?

☒ Yes ☐ No

\* Reference number

### 1. Applicant

\* Organisation

### Address

\* Building number or name

\* Street

\* City or town

County or administrative  
area

\* Postcode

\* Country

\* Name of contact

\* Telephone number

Fax number

\* Email

### 2. Agent

\* Are you an agent acting on behalf of the Applicant?

☐ Yes ☒ No

### 3. Fee

\* State the arrangement for the application fee payment:

☒ BACS ☐ CHAPS ☐ Cheque

\* Please provide payment  
reference details

Continued from previous page...

2019

#### 4. Confirming why the Planning Inspectorate should receive the application

\* Brief statement to explain why this application is, or is to be treated as, a development for which development consent is required under the Planning Act 2008

Development consent is required to the extent that the development is or forms part of a Nationally Significant Infrastructure Project (NSIP). The Project consists of two linked NSIPs, namely (i) an offshore generating station; and (ii) overhead line realignment works, together with associated development. As the proposed offshore generating station is expected to have a capacity of over 100 MW, it is an NSIP for the purposes of section 14(1)(a) and 15(3) of the 2008 Act. Pursuant to sections 14(1)(b) and 16 of the 2008 Act, the installation of an electric line above ground in England is an NSIP unless it falls within certain exclusions. It is not anticipated that any of the exclusions would apply to the overhead line realignment works, and as such these works form a second NSIP. It is for these reasons that development consent is required under the Planning Act 2008.

#### 5. Non-technical description of the Proposed Development

\* Brief non-technical description of the Proposed Development

The Proposed Development comprises the construction and operation of up to 67 wind turbine generators (WTGs) with a maximum tip height of up to 300 metres, together with up to four offshore electrical platforms, an offshore construction, operation and maintenance platform, a meteorological mast, inter-array cables linking the WTGs to each other and to the offshore electrical platforms, platform link cables and up to two export cables to take the electricity generated by the WTGs from the offshore electrical platforms to landfall.

The onshore works include landfall connection works north of Thorpeness in Suffolk, underground cables running from landfall to a new onshore substation located in Grove Wood, Friston, Suffolk together with a new National Grid substation and National Grid overhead line realignment works including the reconstruction and/or relocation of up to three pylons, construction of up to one additional pylon and the construction of up to three permanent sealing end compounds.

A full description of the works can be found in Chapter 6 (Project Description) of the Environmental Statement (Document 6.1.6).

#### 6. Location or route of the Proposed Development

\* Description of location of application site(s), or route of development (reference to appropriate plans)

The wind turbine generators would be located in the southern North Sea approximately 36km from the Suffolk coast at its nearest point. The offshore windfarm site occupies an area of up to 208km<sup>2</sup>.

The landfall connection works will be located north of Thorpeness in Suffolk, and the onshore substation and overhead line realignment works will be located in the vicinity of Grove Wood, Friston. The onshore cable route is approximately 9km in length and would run from landfall in a northern direction for approximately 1.5km and would then travel in a south-western and then western direction to the onshore substation location.

The location of the Proposed Development is shown on the Location Plan (offshore) (Document 2.1.1) and the Location Plan (onshore) (Document 2.1.2) and is more fully described in Chapter 6 (Project Description) of the Environmental Statement (Document 6.1.6).

\* Is the site a single site or a linear site?

☐ Single site

☒ Linear site

[Add another reference](#)

**Continued from previous page...**

Regulation 6 of the Infrastructure Planning (Applications: Prescribed Forms and Procedures) Regulations 2009 requires additional information to be submitted with the following types of development.

\* Please check any of the following boxes that apply:

- ☒ Construction or extension of a non offshore generating station (Reg. 6 (1a))
- ☒ Construction or extension of an offshore generating station (Reg. 6 (1b))
- ☐ Highway related development (Reg. 6 (2) (part 1))
- ☐ Construction or alteration of a railway (Reg. 6 (2) (part 2))
- ☐ Construction or alteration of harbour facilities (Reg. 6 (3))
- ☐ Construction of a pipeline (Reg. 6 (4))
- ☐ Construction or alteration of a hazardous waste facility (Reg. 6 (5))
- ☐ Construction of a dam or reservoir (Reg. 6 (6))

**Construction or extension of a non offshore generating station (Reg. 6 (1a))**

\* Provide details of the proposed route and method of installation for any cable

The application is of an offshore generating station that falls within Regulation 6(1)(b) of the above regulations. East Anglia ONE North Limited (the Applicant) has supplied a Cable Statement (Document 7.1), which explains the proposed route and method of installation for any cable for the onshore and offshore works. Further details are provided in Chapter 6 (Project Description) of the Environmental Statement (Document 6.1.6).

\* Provide a statement as to whether applications will be made for safety zones

The application is of an offshore generating station that falls within Regulation 6(1)(b) of the above regulations. The Applicant has therefore supplied a Safety Zone Statement (Document 7.2), which explains the applications that will be made for the safety zones during construction of the Project and the likely timings of those applications. The Applicant does not intend to apply for safety zones during the operational phase of the Project (except for major maintenance activities).

**Construction or extension of an offshore generating station (Reg. 6 (1b))**

\* Provide a statement of who will be responsible for designing and building the connection to the electricity grid

The Applicant will be responsible for designing and building the connection to the electricity grid to the point of a new National Grid substation (such works also forming part of this application). These works include offshore export cables, onshore cables and an onshore substation. It is anticipated that National Grid Electricity Transmission plc (NGET) will be responsible for the detailed design and subsequent construction of the National Grid substation including associated sealing end compounds, overhead line realignment works and connection to the national electricity grid.

\* Is it a gas fuelled generating station?

- ☐ Yes ☒ No

**23. Any other plans, drawings and sections necessary to describe the proposal for which development consent is sought, and any other documents, reports or information to support the application**

Provide a brief description of any other plans, drawings and sections that are being submitted with this application

Provide a brief description of any other information provided that is in support of the application, but which has not been explicitly required

East Anglia TWO and East Anglia ONE North are separate projects, each with their own independent Development Consent Order (DCO) application. East Anglia ONE North is being developed by East Anglia ONE North Limited and East Anglia TWO is being developed by East Anglia TWO Limited. As the application process for each project is running in parallel, interface documents have been produced to assist the Planning Inspectorate and stakeholders in easily identifying differences across the two applications.

## **Bolton, Julia**

---

**From:** Mignano, Kate <KATE.MIGNANO@planninginspectorate.gov.uk>  
**Sent:** 15 October 2019 15:30  
**To:** Bolton, Julia; Evans, Sian  
**Cc:** East Anglia Two; East Anglia ONE North; Sully, Kay  
**Subject:** EXTERNAL: RE: EA1N / EA2 Application Form

Dear Julia

This email is to confirm what we discussed today regarding completion of the application form.

The application form appears to have an error in question 22.

When you select the option "Construction or extension of an offshore generating station" the form provides the additional questions for completion. However, these additional questions are not the correct questions for APFP Reg 6 (1)(b), they are the questions which should be generated for Reg 6 (1)(a) (Construction or extension of a non offshore generating station).

For the application form to provide the additional questions required for APFP Reg 6 (1)(b), you may wish to select the option for "Construction or extension of a non offshore generating station"

The APFP Regulation 6(1) requires the following:

### **Matters prescribed in relation to applications for specific types of projects**

6.—(1) If the application is for the construction or extension of a generating station the application must be accompanied by—

(a) if the application is for a generating station, that is not an offshore generating station—

(i) a statement of who will be responsible for designing and building the connection to the electricity grid; and

(ii) if a gas fuelled generating station, a statement of who will be responsible for designing and building the gas pipeline connection to the generating station; and

(b) if the application is for an offshore generating station—

(i) details of the proposed route and method of installation for any cable; and

(ii) a statement as to whether applications will be made for safety zones.

As you can see from the screen shots below, the form incorrectly generates the additional boxes needed to comply with Reg 6(1) for offshore / onshore generating stations:

Regulation 6 of the Infrastructure Planning (Applications: Prescribed Forms and Procedures) Regulations 2009 requires additional information to be submitted with the following types of development.

\* Please check any of the following boxes that apply:

☒ Construction or extension of a non offshore generating station (Reg. 6 (1a))

☐ Construction or extension of an offshore generating station (Reg. 6 (1b))

☐ Highway related development (Reg. 6 (2) (part 1))

☐ Construction or alteration of a railway (Reg. 6 (2) (part 2))

☐ Construction or alteration of harbour facilities (Reg. 6 (3))

☐ Construction of a pipeline (Reg. 6 (4))

☐ Construction or alteration of a hazardous waste facility (Reg. 6 (5))

☐ Construction of a dam or reservoir (Reg. 6 (6))

**Construction or extension of a non offshore generating station (Reg. 6 (1a))**

\* Provide details of the proposed route and method of installation for any cable

\* Provide a statement as to whether applications will be made for safety zones

Regulation 6 of the Infrastructure Planning (Applications: Prescribed Forms and Procedures) Regulations 2009 requires additional information to be submitted with the following types of development.

\* Please check any of the following boxes that apply:

☐ Construction or extension of a non offshore generating station (Reg. 6 (1a))

☒ Construction or extension of an offshore generating station (Reg. 6 (1b))

☐ Highway related development (Reg. 6 (2) (part 1))

☐ Construction or alteration of a railway (Reg. 6 (2) (part 2))

☐ Construction or alteration of harbour facilities (Reg. 6 (3))

☐ Construction of a pipeline (Reg. 6 (4))

☐ Construction or alteration of a hazardous waste facility (Reg. 6 (5))

☐ Construction of a dam or reservoir (Reg. 6 (6))

**Construction or extension of an offshore generating station (Reg. 6 (1b))**

\* Provide a statement of who will be responsible for designing and building the connection to the electricity grid

Please ensure when completing the form you select the option for Reg 6 (1)(a) (Construction or extension of a **non offshore** generating station) to generate the correct additional boxes. You may wish to refer to this in your cover letter.

I hope this is clear.

If you require any further assistance please don't hesitate to contact me.

Kind regards

Kate

**Subject:** EA1N / EA2 Application Form

Hi Sian

As discussed on the call, the application form I am completing refers to the 'construction or extension of an offshore generating station' as Regulation 6 (1)(b). See screen shot below.

*Continued from previous page...*

Regulation 6 of the Infrastructure Planning (Applications: Prescribed Forms and Procedures) Regulations 2009 requires additional information to be submitted with the following types of development.

\* Please check any of the following boxes that apply:

- ☐ Construction or extension of a non offshore generating station (Reg. 6 (1a))
- ☒ Construction or extension of an offshore generating station (Reg. 6 (1b))
- ☐ Highway related development (Reg. 6 (2) (part 1))
- ☐ Construction or alteration of a railway (Reg. 6 (2) (part 2))
- ☐ Construction or alteration of harbour facilities (Reg. 6 (3))
- ☐ Construction of a pipeline (Reg. 6 (4))
- ☐ Construction or alteration of a hazardous waste facility (Reg. 6 (5))
- ☐ Construction of a dam or reservoir (Reg. 6 (6))

**Construction or extension of an offshore generating station (Reg. 6 (1b))**

Regulation 6 (1)(b) states:

6.—(1) *If the application is for the construction or extension of a generating station the application must be accompanied by—*

*(b) if the application is for an offshore generating station—*

- (i) details of the proposed route and method of installation for any cable; and*
- (ii) a statement as to whether applications will be made for safety zones.*

Therefore I understand I have selected the correct box. Can you please confirm which box I need to select anything further to complete this application? Please could you respond today if possible.

Thank you.

Kind regards  
Julia
