I submitted a Relevant Representation in January but since watching, in full, the OFHs I wish to make a Written Representation. I was moved and uplifted by all those who spoke against the proposals (i.e. 100 per cent of the speakers). They were eloquent, emotional and passionate in their detailed opposition and all addressing different issues - the threat to wildlife, the destruction of agricultural land as well as historic footpaths, the effect on tourism, the disregard of Grade II listed buildings, including the church, the industrialisation of beautiful countryside, the idea that if these two projects were approved many more would follow, and the blight on the lives of many. I support the witness statement of David Attenborough (in A Life on Our Planet) who says we need more rewilding - not more industrialisation - if we are to save the planet. Renewable power is essential but it must be done in a way that doesn't scar the landscape or people's lives. I also support the Written Representations of SASES, SEAS and SoS.
