---

For EA1N and EA2 team.

Unique Ref : 20024098/20024099

This evening's latest deadline for comments on the examination of these projects does not sit well with a local community already under immense pressure due to the current renewed lockdown. The fact that so many individuals are now taking a serious interest is in itself testament to the gravity of the projected developments and the devastating effect they will have on our community . They are joining with the existing campaign groups and organisations who have for some years been making strong representations with regard to the Friston Hub Project ( for that is what it is ) and the need for it to be shelved - if for no other reason than plain common sense.

There is no point in detailing here again the many flaws to the National Grid intentions for this area, and SPR is the very heavy tool which they intend to deploy and change this special part of East Anglia for ever.

We will all continue to defend our communities to the best of our ability, although as we have said before this process ought to have been halted until normal social behaviour can be safely resumed.

The prospect of having to start this whole process all over again in April for the examination of Sizewell C is truly dispiriting.

Yours sincerely

Graeme Murray
