Good afternoon.

As one of the 3 ward members for the affected area, I wish to continue to reflect the significant comments of residents to the selection of this site for the onshore structure with its attendant infrastructure.

With no letters of support, and hundreds expressing their deep concerns I feel I would be negligent not to feed this into the consultation having been given the opportunities. The remit of all District Councillors is being able to support and represent the residents of the Ward for which they have had the honour to be elected, as mentioned in the previous deadline. It is important that the public do feel that they are being listened to and that their views, comments and communications are being represented and acknowledged.

Wind is one of the better means of generating energy, however, there is no doubt that the current application is not the right location or solution to providing the much needed energy for this country and there are other better options available.

Councillor TJ Haworth-Culf | Aldeburgh & Leiston Ward

East Suffolk Council
