---

Good morning Caroline,

I copied the Planning Inspectorate in on this correspondence so that the Planning Inspectorate are made aware of the lack of information and communication from SPR and me as a resident of Friston. I live in Friston House and we share a boundary with the current site investigative works. SPR are very good at 'talking the talk' but they do not follow through.

I copied you in on the email to show that I have responded to their "information update" asking for more detailed information (which is seemingly encouraged at the bottom of their blanket email post) – important information that would enable me to manage my time to avoid the stress of noise from drilling – I still have not yet had any kind of response to my email (including an acknowledgement of receipt of it) – SPR just churned out another "information update" blanket email which still has not addressed the questions that I asked.

I can not express upon you the stress that we are currently under, in particular my husband, we are desperate to try and manage our situation as best we can to avoid any unnecessary exposure to noise from the works but can not do this if we are not informed correctly. For your information the vegetation on the fields on which SPR are working has been sprayed, killing all vegetation, resulting in our wood being overrun with the displaced wildlife whose home is now occupied with these investigative works and whose food source has been decimated.

So in answer to your questions:

My intention was for this email chain to be evidence of the poor treatment by SPR of a resident who's life is being blighted by their project – if the only way for it to be part of the process is as a submission – then yes please, I would like it submitted.

Is this sufficient or do you wish me to send you a separate email with all the relevant attachments?

Many thanks and very best wishes

Ning Fulford

Good morning Ning,

Please could I check if this submission was intended for the Examination? The letter is not addressed to the Examining Authority. If you wish this to be included in the examination could you let us know.

As your intention was for it to be a deadline 11 submission, I would recommend you resubmit it addressed to the Examination Authority to avoid any confusion who the intended recipient is. However, we can accept it as it is, if you wish.

Please could you advise us how you wish to proceed, and also if you wish it to be included for both East Anglia One North and East Anglia Two?

Kind regards

Caroline

To whom it may concern at SPR,  
I have not yet had a direct response to my questions to you for more information from your "SPR Investigation Works Update – 19/05/21" regarding Drilling bore holes at the proposed substation site at Friston.

I have however just received another blanket email titled "SPR Investigation Works Update – 20/05/21" which still does not address the questions that I asked. To refresh your memory I have attached a copy of the email below (which I sent to the email advertised by you under the heading of "Get in Touch – please provide your comments and questions to:") sent yesterday at approximately 10:50

"To whom it may concern,

With regard to your recent Investigation Works update 19 May 2021 email, in particular the section on Friston/Knodishall - please may I have more detail. You say that a rig will be arriving on Thursday from Sizewell and that an additional rig will be arriving later in the week from Aldringham. Please could you clarify: When will the drilling actually start?

What are the working hours (and days) of the rig?  
What level of noise does a single working rig make?  
What level of noise does a combination of two rigs working in tandem make?  
Thank you.  
Ning Fulford (Resident of Friston)"

I look forward to your response.  
Best wishes  
Ning Fulford
