Hello – ref 20024643

I'm extremely disheartened to learn that the struggle continues against the irreversible destruction that will be inflicted on a huge expanse of the east coast by the Sizewell sea link. The intention to pursue this particular path is incomprehensible. Of course we need offshore energy as part of the clean-energy mix, but please let's proceed in a careful and sensible manner for the best possible environmental and business outcomes.

Thanks

Fay Sweet
